- Very hardy cattle (Hard Red water, Gallsickness and Sourveld area)
- Top mothering ability
- Well adapted to the grasslands and scrubs on the rolling hills of the escarpment
- Exceptional fertility
- Can walk long distances in mountainous terrain
- Intelligent temperament

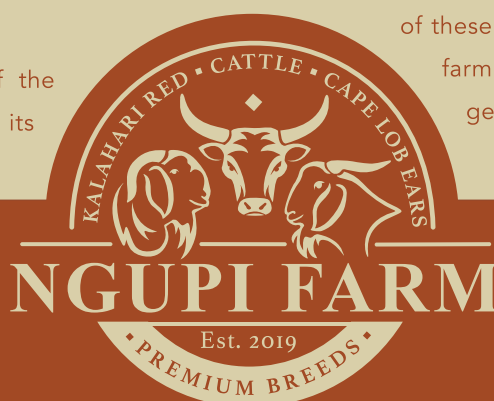

The Farm

Ngupi Farm is nestled in the rolling hills of the Mpumalanga Drakensberg escarpment with its

grassland and the occasional scrub on the farm called Dalmanutha close to Machadodorp. The Farm was established in 2019 when Nobbie and Louisa fell in love with the Nguni breed after a visit to David Hill of the Hall Hill farm around Ermelo. Nobbie immediately purchased his first thirty pregnant Nguni cows and later purchased a bull from oom Schalk van der Walt at Gelykfontein Stud.

Ngupi Farm has visited, selected and purchased some of the best genetics from some of the top Nguni breeders across Southern Africa. Ngupi Farm has currently more than 60 stud approved and registered animals within its breeding herd of over 200 cows. Most of these animals were born and bred on the Dalmanutha farm. For your next purchases contact us for the best genetics (stud or commercial) available in the breed.
